OUR GOAL

High-school is the most important stage for shaping a young mind; to make them look into the right direction, to make them aware of the various career choices, to let them know the "real-time" scenarios from their dream professions.

This is very much do-able if established professionals from diverse fields step up and share the insider's stories. By bringing our World-wide Mentor pool to the students, we want to clear their doubts, and help them to make a well-informed choice before stepping into their college days.

MENTOR
VIEWS

HOW WE WORK?

General Session:

Here we invite professionals from diverse fields in our live webinars every 3 weeks (Saturday nights, YouTube live, anyone can join) to make the students aware of different career choices, and to let them know the career road-map of the speakers.

In these webinars, the students can directly submit their questions via live chat box in our Facebook page/YouTube Channel.

Customized Sessions

Every school and their student base is very unique and different from others, we understand that and we value that.

We would be happy to bring Mentors from professions suggested by the schools, and are also open for conducting sessions among a small batch (certain class or section).

WHAT MAKES US DIFFERENT?

We are not a general career counselling company; we won't give any 'what career should you choose' form to fill-up. We are not going to give the students a 'good college-list' either. Rather, if a student aspires to be a 'Data Scientist', we will bring a 'Data Scientist' to the student, so that he/she knows what's awaiting them, what skill-set they should build from now on.

HOW CAN YOU HELP US?

Our mission is only successful if we can reach out to students in large numbers, and that's where the Teachers can contribute significantly. We will provide you the details of our sessions along with a link to join. You can help the cause by sharing the link to our live sessions through your school's WhatsApp group/Bulletin board. Or, You can write to us for having a more customized session for your students.

Importantly, it's all *free of cost*.

HOW DO WE CONDUCT CUSTOMIZED SESSIONS

As a 1st step, we send a survey link for the students through the help of teachers. This survey helps us to estimate the number of expected participants, to have an idea on their interest and availability.

As a 2nd step, we conduct a very informal and casual interactive session with the students via a google meet chat. This session is for having general introduction, to know the career plans of the students, and most importantly to make them feel comfortable in asking questions.

In the final step, based on the information we've gathered from the Intro session; we will invite speakers from specific fields in which the students have showed interest in. This session will be very specific, where the speaker will be answering students queries.

To develop soft skills, we also offer to conduct online creative contests among students (could be a broader audience, for example, one group is class IX-X, and the other is XI-XII).

Global yet United

"Mentorviews have encouraged and supported me in bridging the communication gap. I got introduced to many encouraging mentors who have helped me to carve out a basic plan for my career. I hope to attend more their live sessions. "

----- *Tamaghno Rakshit, Class X, Central Modern School*

"The perfect place to find guidance about career from extremely knowledgeable and friendly mentors. The insightful sessions on YouTube are a guiding light for anyone looking for career advice. "

----- *Ananya Chatterjee, 2nd year, Calcutta Institute of Engineering Collge.*

"Being a part of Mentorviews have helped me step out of my comfort zone, to connect, communicate and to learn. The live sessions made it clearer for us about the lives of the mentors, on when & how to proceed through our career path "

----- *Aratrika Dutta, Class XII, Auxilliam Convent School.*

MEET THE MENTOR-BOARD

Dr. Tanmoyita Nayak
Molecular Biologist,
Germany

Dr. Arijit Sharma
Assistant
Professor, IIT,
India

Dr. Aswini Krishnan
Cancer Biologist,
Switzerland

Dr. Abhishek Ghoshal
Conservation
Ecologist, India

Koushik Sasmal
Electrical Engineer
Germany
